

Help protect the many lives you touch.

**Schedule your 2007-2008 influenza vaccination today!**

Place: \_\_\_\_\_

Date: \_\_\_\_\_

Time: \_\_\_\_\_

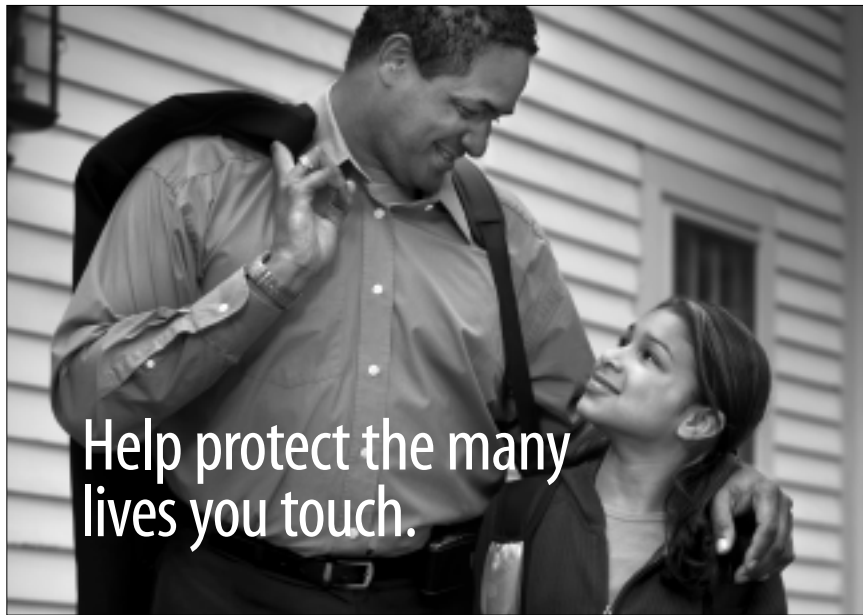

For questions regarding this event, please contact:

\_\_\_\_\_

Influenza vaccination may not prevent the disease in 100% of individuals. Persons should consult their healthcare provider to determine if they have a condition that precludes them from receiving the vaccine. All vaccines have side effects. The most common side effects of influenza vaccines include local reactions and mild general symptoms.
